Orlando, FL

### MEDICAL/DOCTORATE DEGREE

- University of Central Florida College of  
Medicine  
Tampa, FL

### PROFESSIONAL SOCIETIES & ASSOCIATIONS

- American Society for Clinical  
Pathology
- College of American Pathologists

Dr. Heather Gridley joined Incyte Diagnostics in 2024, bringing with her extensive expertise in anatomic and clinical pathology. She earned her Bachelor of Science degree in Medical Laboratory Science, cum laude, from the University of Central Florida in 2010 and subsequently obtained her Doctor of Medicine from the same institution in 2015. Following her medical degree, Dr. Gridley completed her residency in anatomic and clinical pathology at Orlando Health in Florida where she served as Chief Resident from 2018 to 2019 and was honored with the “Resident of the Year” award in 2017. Additionally, she achieved the highest RISE score in her graduating class.

Dr. Gridley pursued fellowship training in hematopathology at the University of New Mexico in Albuquerque, completing it in 2020. She then advanced her subspecialty training with a fellowship in Oncologic Surgical Pathology at the renowned Moffitt Cancer Center in Tampa, Florida, finishing in 2021. Her expertise encompasses a wide range of pathology services, including general surgical pathology, hematopathology, and oncologic surgical pathology, with particular experience in tumor board participation, frozen section interpretation, non-gynecologic cytology, and peripheral blood smear analysis.

Before joining Incyte Diagnostics, Dr. Gridley practiced at Mountainview Hospital in Las Vegas, Nevada, where she took on key responsibilities, including medical directorship of an ancillary surgical center. Her diverse experience also includes roles at the Colon & Rectal Clinic of Orlando and the Florida Brain Bank, where she handled small biopsy grossing and brain

tissue preservation, respectively.

Throughout her career, Dr. Gridley has remained active in academic and professional circles, presenting at numerous conferences and engaging in resident and medical student education. Her research contributions include case reports and presentations on various topics, such as plasma cell neoplasms and acute myeloid leukemia.
